Projects

• Imtech Solutions

Web application for the distribution of IT products and services in B2B & B2C.

Links:

[Imtech Solutions](#)

• EkiClik

Fintech web application specialized in providing services for financial institutions, including both the client section and back-office section for two banks.

Links:

[EkiClik AI SALAM](#)

• Wissal Store

Web application for a company specialized in selling IT equipment for businesses, including both the client section and the back-office section.

Links:

[Wissal Store](#)

• E-Taysir

Mobile application for the digitalization of banking file processing.

• Coopérative Cap Milev

A custom ERP that centralizes operations: FIFO inventory with expiration tracking, order and billing workflows, client/supplier payment management, and accounting reports — all behind role-based access for different staff roles.

Links: [Coopérative Cap Milev](#)

Flexy-Pro

Flexy Pro is a full-stack digital distribution platform I built for managing prepaid telecom services through a multi-level reseller network (admin, wholesaler, retailer). The system combines a Spring Boot backend with a server-rendered web interface (Thymeleaf) to handle wallet-based transactions, balance transfers, reseller gain management, and provider-integrated operations (Flexy, internet packages, and gift cards). It includes secure authentication/authorization, operation history and reconciliation tools, PDF invoice generation with verification support, multilingual UI, and production-focused deployment features like Docker, PostgreSQL, monitoring endpoints, and automated backup integration.

Link: [Flexy-Pro](#)

Facture YB

A self-service invoicing platform where each user manages their own professional profile and documents: draft-to-invoice workflows, QR-code-verifiable PDF documents accessible via a public link, a metrics dashboard, and automated, worry-free backups — all built on Spring Security with email-based account recovery.

• Web Application For Robot Data Management

Developed a **web-based control system** allowing remote management of robots via a **shared database**, enabling real-time monitoring and command execution.

• Multiplatform application for the Thematic Agency for Research in Social and Human Sciences

Developed a **cross-platform solution** to manage research projects, track progress, and facilitate collaboration between researchers and administrative staff.

• Web application for the management of housing applicants

Developed a **full-stack solution** to manage applicant data, track application status, and generate reports for housing authorities.
